

The Best of Every Season

Hinerua Hebe*

Hebe 'Hinerua'

Height: 3 feet

Spread: 5 feet

Sunlight: ○ ●

Hardiness Zone: 7

Other Names: Shrubby Veronica

Description:

A lovely evergreen upright shrub with olive green glossy leaves; rarely flowers, but when it does it is quite impressive; will tolerate some mild frost, but should be sheltered in colder areas

Ornamental Features

Hinerua Hebe has masses of beautiful corymbs of white flowers at the ends of the branches from mid summer to early fall, which are most effective when planted in groupings. It has attractive olive green foliage. The glossy pointy leaves are highly ornamental and remain olive green throughout the winter. The fruit is not ornamentally significant.

Landscape Attributes

Hinerua Hebe is an open multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting birds, bees and butterflies to your yard. It has no significant negative characteristics.

Hinerua Hebe is recommended for the following landscape applications;

The Best of Every Season

- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Hinerua Hebe will grow to be about 3 feet tall at maturity, with a spread of 5 feet. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Hinerua Hebe makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, this plant may be too tender to survive the winter if left outdoors in a container. Contact our store for more information on how to protect it over the winter months.
