

The Best of Every Season

Daruma Chinese Fringeflower*

Loropetalum chinense 'Daruma'

Height: 3 feet

Spread: 4 feet

Sunlight: ☉ ●

Hardiness Zone: 6

Other Names: Chinese Fringe Flower, Chinese Witch Hazel

Description:

A pretty spring-blooming dwarf variety with stunning pink strap-like flowers literally smothering the plant; coppery-red new foliage matures to burgundy with a purple cast; an easy to grow and well-behaved shrub for general garden use

Ornamental Features

Daruma Chinese Fringeflower is draped in stunning fragrant pink strap-like flowers along the branches in early spring. Its oval leaves emerge coppery-bronze in spring, turning burgundy in color the rest of the year. The fruit is not ornamentally significant.

Landscape Attributes

Daruma Chinese Fringeflower is a multi-stemmed evergreen perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Daruma Chinese Fringeflower is recommended for the following landscape applications;

Planting & Growing

Daruma Chinese Fringeflower will grow to be about 3 feet tall at maturity, with a spread of 4 feet. Although it is technically a woody plant, this fast-growing plant can be expected to behave as a perennial in our climate if planted outdoors over the winter, usually regrowing from its base (crown) the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.
