

The Best of Every Season

Golden Barrel Cactus
Echinocactus grusonii

Height: 24 inches

Spread: 3 feet

Sunlight: ☉ ●

Hardiness Zone: 9

Other Names: Golden Ball Cactus, Mother-in-law's Seat

Description:

A slow growing, barrel shaped cactus displaying prominent ribs adorned with bright golden spines; bright yellow flowers from late spring to summer on mature specimens in full sun; a stunning accent plant for a bright indoor area

Features & Attributes

Golden Barrel Cactus has yellow cup-shaped flowers held atop the stems from late spring to early summer, which are interesting on close inspection. Its attractive succulent round leaves remain dark green in color with pointy gold spines throughout the year.

This is an open herbaceous evergreen houseplant with a more or less rounded form. Its extremely fine and delicate texture is quite ornamental and should be used to full effect. This plant should never be pruned unless absolutely necessary, as it tends not to take pruning well.

Planting & Growing

When grown indoors, Golden Barrel Cactus can be expected to grow to be about 24 inches tall at maturity, with a spread of 3 feet. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. This is a unique plant in that it requires extremely dry, well-drained soil, and it will die if left in standing water for any length of time - in fact it will suffer if it is over-watered. The soil should be allowed to go completely dry to the touch an inch or two deep for prolonged periods, and it may only need watering once every few weeks. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in sandy soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
