## **Yadkin Gold Dwarf Threadleaf Falsecypress\***

*Chamaecyparis pisifera 'Yadkin Gold'*

Height: 3 feet

Spread: 4 feet

Sunlight: ☉ ●

Hardiness Zone: 4

Other Names: Japanese Falsecypress, Sawara Falsecypress

### **Description:**

A mounded, dwarf evergreen with gracefully pendulous branches bearing bright gold foliage which turns bronzy in fall; one of the smaller varieties available, a great choice for adding texture to a garden; prefers humid environments

### **Ornamental Features**

Yadkin Gold Dwarf Threadleaf Falsecypress has attractive gold foliage. The threadlike leaves are highly ornamental and turn coppery-bronze in fall. Neither the flowers nor the fruit are ornamentally significant.

### **Landscape Attributes**

Yadkin Gold Dwarf Threadleaf Falsecypress is a dense multi-stemmed evergreen shrub with a shapely form and gracefully arching branches. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a relatively low maintenance shrub. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Yadkin Gold Dwarf Threadleaf Falsecypress is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- General Garden Use
- Container Planting

### **Planting & Growing**

Yadkin Gold Dwarf Threadleaf Falsecypress will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for 60 years or more.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.

Yadkin Gold Dwarf Threadleaf Falsecypress makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
