#### **Description:**

A strong growing vigorous variety featuring large leaves that emerge chartreuse and brightens to gold in summer; provides beautiful texture and contrast to other plants; lavender spikes of flowers in late summer

#### **Ornamental Features**

Chesterland Gold Hosta features dainty spikes of lavender tubular flowers rising above the foliage in late summer. Its attractive textured heart-shaped leaves emerge chartreuse in spring, turning gold in color throughout the season. The fruit is not ornamentally significant.

#### **Landscape Attributes**

Chesterland Gold Hosta is a dense herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Chesterland Gold Hosta is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover

### **Planting & Growing**

Chesterland Gold Hosta will grow to be about 20 inches tall at maturity, with a spread of 4 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 4 feet apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
