

The Best of Every Season

Short-Needled Japanese Blue Pine

Pinus parviflora 'Glauca Brevifolia'

Height: 40 feet

Spread: 40 feet

Sunlight: ☉

Hardiness Zone: 4

Description:

A stately pyramidal evergreen with beautiful stunted blue foliage and an upright habit; mildly salt tolerant and will prosper in most soils as long as they have good drainage; a picturesque and regal tree for the perfect garden accent

Ornamental Features

Short-Needled Japanese Blue Pine is primarily valued in the landscape for its ornamental globe-shaped form. It has attractive bluish-green evergreen foliage. The small twisted needles are highly ornamental and remain bluish-green throughout the winter.

Landscape Attributes

Short-Needled Japanese Blue Pine is a dense evergreen tree with a strong central leader and a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Short-Needled Japanese Blue Pine is recommended for the following landscape applications;

- Accent
- Shade

Planting & Growing

Short-Needled Japanese Blue Pine will grow to be about 40 feet tall at maturity, with a spread of 40 feet. It has a low canopy with a typical clearance of 5 feet from the ground, and should not be planted underneath power lines. It grows at a slow rate, and under ideal conditions can be expected to live to a ripe old age of 100 years or more; think of this as a heritage tree for future generations!

This tree should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
